Description of Our Glass Works

We adore ancient symbols, and humbly try to imitate their spirit in our work. Our works are made of stained glass in the Tiffany method – glass pieces are cut, ground, polished and soldered by hand. These are not mosaic works! Every amazing masterpiece is built piece by piece without a leading model, by a unique technique created by us. Similar works can be ordered with other glass colors and textures. It takes a couple of weeks to build.

Notes:

1. The vases are not designed for liquids.
2. Maintenance: All works require yearly care of cleaning and lubrication. Instructions will be shipped to customer. Slight damages caused in the customer house can be repaired in our workshop. The works are fragile and should be handled carefully.
3. We have a model gallery for ordering works in almost any size and any existing glass color, just email us to ifyunim@walla.co.il
4. Guarantee for shipping: We take full responsibility for shipping.
